SECTION 17 - DUST CONTROL

17-1 GENERAL

Dust control is the application of water or dust palliative to alleviate or prevent dust nuisance resulting from the Contractor's operations, either within or outside the Work right-of-way. All dust control activities must comply with Section 10-4, "Erosion, Sediment, and Water Pollution Control", of these Specifications.

Dust control must be performed by the Contractor at any time dust resulting from the Contractor's operations becomes a nuisance or visual impediment or when directed by the Agency. Failure to adequately control dust is cause for the Agency to direct the Contractor to suspend operations or for the Agency to perform such activity with all costs to be borne by the Contractor.

The application of water for dust control may be performed by the Contractor for the Contractor's convenience. Water must be applied as provided in Section 16, "Water Used in Construction", of these Specifications.

17-2 DUST PALLIATIVE

Dust palliative must be applied when, in the opinion of the Agency, this type of dust control is required. Dust palliative must be an asphaltic emulsion binder as specified in the State Specifications. Dust palliative must be applied as specified in the State Specifications, or as directed by the Agency.

17-3 MEASUREMENT AND PAYMENT

Full compensation for applying water for dust control is included in the prices paid for the various items of work involved and no additional compensation will be paid.

When asphaltic emulsion binder for dust palliative is paid for as an item of work, the unit of measurement is 1 ton. Quantities of asphaltic emulsion binder for dust palliative to be paid for will be determined prior to the addition of water as provided in the State Specifications. The price paid per ton for asphaltic emulsion binder for dust palliative includes full compensation for furnishing all labor, materials, tools, equipment, and incidentals and for doing all the work involved in adding water, mixing, and applying the dust palliative as shown or specified in the Contract, as specified in these Specifications, and as directed by the Agency.

When the Contract does not include a pay item for asphaltic emulsion binder for dust palliative and the Agency directs the Contractor to apply dust palliative, furnishing and applying dust palliative will be paid for as extra work as provided in Section 9, "Changes and Claims", of these Specifications.
